Crestron Controller

This document will explain how to operate the projection system in classroom ACA85, 86, 89, 90, 185, 186, 187, 188, 189, 190, and Aspen 005.

When you approach the system, the panel’s screen will be black. Touch anywhere to wake it from sleep mode. Touch again to access the control screen.

To turn on the projection system, press the red, power button on the control screen:

Then, press one of the input buttons to select the video source. Your options are: DVD, Podium PC, VGA laptop, and HDMI laptop:
After you make a selection, the source name you have chosen will appear on the screen indicator:

If you select DVD as your input, press the Control DVD button to access the DVD control screen. From there, you can open and close the dvd tray, play, stop, fast forward, and rewind the DVD:

Press the Back button to return to the main control screen:
**Shutting Down**

Before you leave the room, please shut down the system. First, log off the Podium PC. Then, press the red Shut Down button in the lower left hand corner on the control panel:
